

Bio-based fertilizers as part of the circular economy: origin, manufacturing and value

Carmo Horta

Escola Superior Agrária de Castelo Branco (PT)

24 Maggio 2023 - ore 16 - Aula 7

Seminario in lingua inglese

This seminar will present study cases about (i) the recovery technics of nutrients from organic residues, (ii) fertilizing value of composts and digestates and (iii) fertilizing value of mineral fertilizers obtained from organic wastes.

Carmo Horta is professor at the Polytechnic Institute of Castelo Branco, working on Soil Science, Fertilisation and Crop Nutrition. Working area: Soil fertility evaluation, sustainability of soil fertilisation, agronomic and environmental evaluation of reuse and recycling of organic wastes and bio-based fertilizers.
