

# When science benefits from art

## Seminar

**May 31<sup>st</sup> 2023 (from 11-12) Aula 2**

During about one hour, Luisa Nunes will talk about how illustration is changing concepts of the transversality of areas of communication and scientific dissemination. Come and dive into the ways of creating ecological literacy communicating about science and the amazing Natural World of expeditions, nature diaries, illustrations of species and ecosystems all around the world.

Luisa Ferreira Nunes is a prof. at Polytechnic University of Castelo Branco, Portugal. She teaches Forest Ecology, Entomology, Science Communication and Biomimicry. Luisa has been a National Geographic granted collaborator on expeditions to Alaska, Africa, Central American jungles and the Arctic. She is passionate by naturalist illustration and has 18 books published and several international exhibitions, especially in Natural History Museums. Her research areas are bio-indicator species and general ecology.
