

RIS Inspire Programme is mentoring a new generation of European innovators

Three Schools specifically designed to increase knowledge and innovation generated about food systems and to foster greater societal engagement.

We aim to build a critical mass of new talents with capable multidisciplinary skills able to take on the challenges faced by the agrifood sector.
JOIN US

Do you want to become an effective innovator in the food system in your region?

Sustainable Food Production and Consumption: from Farm to fork

An insight into sustainable production and consumption towards healthier diets, helping to tackle the current obesity levels across RIS countries. You will gain knowledge on the local dimension of this challenge and the Farm-to-Fork dynamics implementation, in order to develop concrete strategies with an entrepreneurial mindset.

Innovative Food Production for a Healthy Planet

An intensive immersion to state of the art methodologies and tools to develop sustainable agriculture with a focus on digital transformation, while linking the role of soil health to target nutrition towards a better health and wellbeing. Guided by an entrepreneurial mindset, you will think of innovative solutions to address challenges on how to reduce the use of chemical inputs, enhance biodiversity and assist soil carbon sequestration.

New technologies to manage food ecosystems

Through this programme you will become a critical thinker, with an increased science literacy, prepared to be part of the next generation of innovators across RIS countries, better enabled and positioned to reach high value jobs and accelerate startups, retaining local talent.
