GreenNexUS

PHD PROGRAMME  
HEALTH, SAFETY AND GREEN SYSTEMS

## Workshop

# Greening the city: health for all.

## Challenges, transdisciplinary approaches, tools and experiences

27/05/2024 – Palazzo Sersanti, Piazza Matteotti 8, Imola

### 14.00 Welcome address

- Rodolfo Ortolani, Presidente Fondazione Cassa di Risparmio di Imola
- Marco Panieri, Sindaco della Città di Imola

Opening: Cesare Sangiorgi (DICAM), Daniele Torreggiani (DISTAL) – University of Bologna

Lectures:

Chair: Daniele Torreggiani (DISTAL), University of Bologna

- Salutogenic design for people and the environment. Evidence from research and practice.  
Maria Beatrice Andreucci - *La Sapienza University, Department of planning, design, technology of architecture*
- From linear to circular: creating sustainable, healthy and resilient urban areas.  
Dafni Avgoustaki - *Agricultural University of Athens, Farm Structures Lab*
- Integrated nature-based solutions and green regeneration to improve quality and safety of the urban environment.  
Alberto Barbaresi - *University of Bologna, DISTAL, Biosystems engineering team*

### 17.30: Discussion

### 18.00: Closure

The workshop is part of the activities organized by the international project Marie Skłodowska-Curie Actions Doctoral network "GreenNexUS - Green-health-safety Nexus for new Urban Spaces", coordinated by the University of Bologna, as a joint effort of the biosystems engineering team of DISTAL (coordination by Prof. Tassinari and Prof. Torreggiani) and the roads team of the DICAM Department (coordination by Prof. Sangiorgi). GreenNexUS is a highly interdisciplinary project that proposes an innovative and multidisciplinary approach to promote the greening of urban environments, territorial regeneration and the safety and accessibility of infrastructures, while simultaneously addressing the challenges posed by climate change. The workshop is organized in collaboration with the PhD program in "Health, safety and green systems", which hosts the doctoral candidates of the GreenNexUS program recruited by the University of Bologna, and from whose concept the GreenNexUS project originated, and will see the participation of researchers coming from the various European universities and companies partners of the project. Due to the relevance of the topics addressed, this event has been considered of remarkable interest by the affiliated to the RESTART network (Rural landscape, Structures and Infrastructure Planning and Valorization), who showed ample interest in participating.

Students, doctoral students, professionals, technicians and all citizens are invited to the workshop.

**Participation is free - Registration at this link:**
